

West Hill Parish Council Traffic Safety Consultation

Friday 22nd March 3.00-6.30pm Village Hall

Speeding cars – they're the number one traffic concern raised by West Hill residents during the past few months. The local Speed-watch group regularly record cars exceeding the speed limits in place across the village.

Children walking safely to and from school is another area for concern. Speeding cars, narrow roads and the lack of footpaths put pedestrians at risk.

West Hill Parish Council has been working with the community to understand and prioritise these issues. Overwhelmingly the biggest concern is the speed of cars and vans travelling along the narrow lanes across the village. The twisting nature of the lanes together with high roadside banks and hedges adds to this risk.

West Hill Parish Council has been working with Traffic Consultants, PJA, to explore ways in which to make the village roads safer for pedestrians, cyclists, horse riders and motorists. Over recent months the consultants have carried out workshops with local residents, measured car speeds and collected data on traffic travelling through the village. They have completed their report and will present it to the village on **Friday 22nd March 3.00-6.30pm at the West Hill Village Hall.**

They will present proposals designed to calm traffic speeds, improve walking routes and improve safety at some of the key road junctions.

The Parish Council want to hear your views. Please come along to the informal drop-in session on Fri 22nd March to see the proposals and discuss them with the Parish Council and Traffic Consultants. It's your village – have your say.

Anne Oliver, Parish Clerk
